PROJECTS

Web Development (HTML, CSS)

- **Food Website** – Designed a homepage with food cards showcasing items in a responsive layout.
- **Nike Shoes Website** – Created a landing page displaying the latest shoe collections.
- **Spotify Clone** – Replicated Spotify's UI with static pages using HTML & CSS.

JavaScript Projects (HTML, CSS, JS)

- **Analog Clock** – Built a real-time clock using JavaScript DOM.
- **Form Validation** – Implemented client-side validation for user input fields.
- **QR Code Generator** – Developed an app that generates QR codes dynamically.
- **Random Password Generator** – Created a tool to generate secure random passwords.
- **Recipe App (API-based)** – Fetched and displayed recipes using a public API.
- **Stopwatch** – Built a timer with start/stop/reset functionality.
- **To-Do List** – Interactive task manager with add/remove functionality.

React + Tailwind CSS

- **Form Validation** – Validated user inputs with real-time feedback.
- **Password Manager** – Stored username, URL, and password securely in local storage.
- **To-Do List** – Task management app with local storage support.

Tailwind CSS Projects

- **X (Twitter) Clone** – Designed a responsive section of Twitter's UI using Tailwind CSS.
